English

**Q:1** The following questions are based on the four sentences given and each sentence is divided into five parts (A), (B), (C), (D), and (E). Part (E) in each sentence is fixed and other parts may not be in the correct sequence. You have to rearrange the other parts of each sentence to make it contextually and grammatically correct and then answer the questions that follow.

1. Two important reports of the Intergovernmental Panel (A)/ on Climate Change (IPCC), on the impact of higher global temperatures (B)/ on land, oceans and the cryosphere, (C)/ lend further urgency to the task before countries (D)/ **now meeting in Paris for the UN conference.** (E)

2. The need for unprecedented (A)/ and urgent action (B)/ the new IPCC assessment underscores (C)/ in all countries that (D)/ **have significant greenhouse gas emissions.** (E)

3. In the United States and Canada (A)/ has fallen by almost 3 billion as a result of (B)/ the research found that (C)/ the total bird population (D) / **habitat loss and changing food supplies.** (E)

4. Under the Paris Agreement, reinforcing the principle of (A)/ to developing countries (B)/ to provide liberal, transparent funding (C)/ It strengthens the case for industrialized nations (D)/ **Common But Differentiated Responsibilities and Respective Capabilities.** (E)

Which of the following is the correct sequence of sentence (1)?

1. ACDBE
2. CABDE
3. CBD AE
4. ACBDE
5. ABCDE

**Q:2** The following questions are based on the four sentences given and each sentence is divided into five parts (A), (B), (C), (D), and (E). Part (E) in each sentence is fixed and other parts may not be in the correct sequence. You have to rearrange the other parts of each sentence to make it contextually and grammatically correct and then answer the questions that follow.

1. Two important reports of the Intergovernmental Panel (A)/ on Climate Change (IPCC), on the impact of higher global temperatures (B)/ on land, oceans and the cryosphere, (C)/ lend further urgency to the task before countries (D)/ **now meeting in Paris for the UN conference.** (E)

2. The need for unprecedented (A)/ and urgent action (B)/ the new IPCC assessment underscores (C)/ in all countries that (D)/ **have significant greenhouse gas emissions.** (E)

3. In the United States and Canada (A)/ has fallen by almost 3 billion as a result of (B)/ the research found that (C)/ the total bird population (D) / **habitat loss and changing food supplies.** (E)

4. Under the Paris Agreement, reinforcing the principle of (A)/ to developing countries (B)/ to provide liberal, transparent funding (C)/ It strengthens the case for industrialized nations (D)/ **Common But Differentiated Responsibilities and Respective Capabilities.** (E)

Which of the following is the correct sequence of the sentence (2)?

1. CBADE
2. CABDE
3. ACBDE
4. DCABE
5. ABCDE

**Q:3** The following questions are based on the four sentences given and each sentence is divided into five parts (A), (B), (C), (D), and (E). Part (E) in each sentence is fixed and other parts may not be in the correct sequence. You have to rearrange the other parts of each sentence to make it contextually and grammatically correct and then answer the questions that follow.

1. Two important reports of the Intergovernmental Panel (A)/ on Climate Change (IPCC), on the impact of higher global temperatures (B)/ on land, oceans and the cryosphere, (C)/ lend further urgency to the task before countries (D)/ **now meeting in Paris for the UN conference.** (E)

2. The need for unprecedented (A)/ and urgent action (B)/ the new IPCC assessment underscores (C)/ in all countries that (D)/ **have significant greenhouse gas emissions.** (E)

3. In the United States and Canada (A)/ has fallen by almost 3 billion as a result of (B)/ the research found that (C)/ the total bird population (D) / **habitat loss and changing food supplies.** (E)

Which of the following is the correct sequence of the sentence (4)?

1. DBCAE
2. DCBAE
3. BCDAE
4. BCADE
5. ABCDE

Q:5 The following questions are based on the four sentences given and each sentence is divided into five parts (A), (B), (C), (D), and (E). Part (E) in each sentence is fixed and other parts may not be in the correct sequence. You have to rearrange the other parts of each sentence to make it contextually and grammatically correct and then answer the questions that follow.

1. Two important reports of the Intergovernmental Panel (A)/ on Climate Change (IPCC), on the impact of higher global temperatures (B)/ on land, oceans and the cryosphere, (C)/ lend further urgency to the task before countries (D)/ **now meeting in Paris for the UN conference.** (E)
  2. The need for unprecedented (A)/ and urgent action (B)/ the new IPCC assessment underscores (C)/ in all countries that (D)/ **have significant greenhouse gas emissions.** (E)
  3. In the United States and Canada (A)/ has fallen by almost 3 billion as a result of (B)/ the research found that (C)/ the total bird population (D) / **habitat loss and changing food supplies.** (E)
  4. Under the Paris Agreement, reinforcing the principle of (A)/ to developing countries (B)/ to provide liberal, transparent funding (C)/ It strengthens the case for industrialized nations (D)/ **Common But Differentiated Responsibilities and Respective Capabilities.** (E)
- Three out of four sentences, when rearranged, form a coherent paragraph. Find the sentence that does not fit into the major theme of the passage.
1. 1
  2. 2
  3. 3
  4. 4
  5. None of these

Q:6 Direction: In the question given below, following sentences are given in a jumbled form. Make a coherent paragraph and answer the given questions.

- Rising sea temperatures are causing coral reefs to die off and negatively impacting marine life.
- Climate change is causing sea levels to rise, leading to the loss of coastal habitats and increased flooding.
- The increasing levels of carbon dioxide in the atmosphere are being absorbed by the oceans, leading to changes in their chemistry.

Date : 9th Jan 2024

English Language - Para Jumble

English

- The use of renewable energy sources, such as wind and solar power, can help reduce the impact of climate change on the oceans.
- The increasing acidification of the oceans is making it difficult for shellfish and other sea creatures to build and maintain their protective shells.
- The melting of Arctic sea ice is causing changes in ocean currents and affecting the distribution of fish species.

Which one of the following is the **THIRD** statement of the paragraph after rearrangement?

1. 1
2. 5
3. 6
4. 3
5. 4

**Q:7 Direction:** In the question given below, following sentences are given in a jumbled form. Make a coherent paragraph and answer the given questions.

- Rising sea temperatures are causing coral reefs to die off and negatively impacting marine life.
- Climate change is causing sea levels to rise, leading to the loss of coastal habitats and increased flooding.
- The increasing levels of carbon dioxide in the atmosphere are being absorbed by the oceans, leading to changes in their chemistry.
- The use of renewable energy sources, such as wind and solar power, can help reduce the impact of climate change on the oceans.
- The increasing acidification of the oceans is making it difficult for shellfish and other sea creatures to build and maintain their protective shells.
- The melting of Arctic sea ice is causing changes in ocean currents and affecting the distribution of fish species.

Which one of the following is the **LAST** statement of the paragraph after rearrangement?

1. 4
2. 1
3. 5
4. 6
5. 3

**Q:8 Direction:** In the question given below, following sentences are given in a jumbled form. Make a coherent paragraph and answer the given questions.

- Rising sea temperatures are causing coral reefs to die off and negatively impacting marine life.
- Climate change is causing sea levels to rise, leading to the loss of coastal habitats and increased flooding.
- The increasing levels of carbon dioxide in the atmosphere are being absorbed by the oceans, leading to changes in their chemistry.
- The use of renewable energy sources, such as wind and solar power, can help reduce the impact of climate change on the oceans.
- The increasing acidification of the oceans is making it difficult for shellfish and other sea creatures to build and maintain their protective shells.
- The melting of Arctic sea ice is causing changes in ocean currents and affecting the distribution of fish species.

Which one of the following statements should consecutively follow statement (1) after rearrangement?

1. 6
2. 3
3. 2
4. 1
5. 5

**Q:9 Direction:** In the question given below, following sentences are given in a jumbled form. Make a coherent paragraph and answer the given questions.

- Rising sea temperatures are causing coral reefs to die off and negatively impacting marine life.
- Climate change is causing sea levels to rise, leading to the loss of coastal habitats and increased flooding.
- The increasing levels of carbon dioxide in the atmosphere are being absorbed by the oceans, leading to changes in their chemistry.
- The use of renewable energy sources, such as wind and solar power, can help reduce the impact of climate change on the oceans.

### Answer Key

1. (5)	2. (2)	3. (3)	4. (2)	5. (3)
6. (2)	7. (5)	8. (1)	9. (4)	10. (3)

### Answers and Solutions

**Q:1** The correct answer is **Option 5** i.e. **ABCDE**.

- The sentence will begin with the part 'A' as it introduces a subject i.e. 'two reports'. All other parts are dependent on some other part.
- 'A' will be followed by the part 'B' as the full form of IPCC is intergovernmental panel on climate change and 'intergovernmental panel' is given in the part 'A' and 'on climate change' is given in the part 'B'. Hence, these two parts should be in the sequence.
- Part 'B' talks about the impact of high temperature and the part 'C' talks about what takes the impact of high temperatures. Hence, 'B' will be followed by 'C'.
- So, we have got a sequence 'ABC' which is given in option 5 only. So we do not have to arrange other parts and our answer will be option 5.

The sentence is: **Two important reports of the Intergovernmental Panel on Climate Change (IPCC), on the impact of higher global temperatures on land, oceans and the cryosphere, lend further urgency to the task before countries now meeting in Paris for the UN conference.**

Hence, the correct answer is **Option 5** i.e. **ABCDE**.

**Q:2** The correct answer is **Option 2** i.e. **CABDE**.

- It seems that there are two parts from which the sentence can begin i.e. part 'A' and the part 'C' but if we begin the sentence with the part 'C' it makes a complete meaningful sentence.
- The part 'C' talks about the emphasis given by the assessment of IPCC.
- Now, part 'A' talks about something upon which IPCC is emphasizing i.e. need for something.
- Further, part 'B' talks about what is the need that part 'A' talks about i.e. urgent action.
- So, we have got a sequence i.e. 'CAB' and this is given in one option only i.e. option 2. Hence, it is the correct answer.

The sentence is: **The new IPCC assessment underscores the need for unprecedented and urgent action in all countries that have significant greenhouse gas emissions.**

Hence, the correct answer is **Option 2** i.e. **CABDE**.

**Q:3** The correct answer is **Option 3** i.e. **CADBE**.

- The sentence will begin with the part 'C' as it talks about a report and the whole sentence is based on that report.
- Part 'C' will be followed by the part 'A' as the report talked about in the part 'C' must be based on a research and the research must have been carried out somewhere. So, part 'A' fits in the context of the given sentence.
- Now, the part 'D' will be followed by the part 'B' because the subject of the report i.e. bird population is given in the part 'D' and the effect on bird population i.e. fall in bird population is given in the part 'B'.
- So, we have got a sequence i.e. 'CADB' and this is given in one option only i.e. option 3. Hence, it is the correct answer.

The sentence is: **The research found that in the United States and Canada the total bird population has fallen by almost 3 billion as a result of habitat loss and changing food supplies.**

Hence, the correct answer is **Option 3** i.e. **CADBE**.

**Q:4** The correct answer is **Option 2** i.e. **DCBAE**.

- There are two parts with which the sentence can begin i.e. part 'A' and part 'D'.
- Now, there is only option in which the sentence begin 'A' i.e. ABCDE. Hence, 'A' must be followed by 'B'.
- But if we look at the sentence there is a preposition at the end of the part 'A' i.e. of and there is a preposition 'to' at the beginning of the part 'B'.
- We if connect these two parts the sentence does not make any sense.
- Now, we will go with the part 'D'.
- The part 'D' talks about the strengthening the case of something and the case is given in the part 'C' i.e. to provide funding.
- Now, the funding will be provided to someone like an individual, an organization or to a country or countries.

- This is given in the part 'B' i.e. to developing countries. Hence, we have got a sequence i.e. 'DCB'.
- And this sequence is given in one option only i.e. option 2. Hence, it is the correct answer.

The sentence is: **It strengthens the case for industrialized nations to provide liberal, transparent funding to developing countries under the Paris Agreement, reinforcing the principle of Common But Differentiated Responsibilities and Respective Capabilities.**

Hence, the correct answer is **Option 2** i.e. **DCBAE**.

**Q:5** The correct answer is **Option 3** i.e. **3**.

If we look at the sentences given in the question we will find that the sentence 1, 2 and 4 talk about IPCC, its report and what the report emphasizing upon.

The report does not give any inference about the fall in population of birds, animals, etc.

The sentence 3 does not fit in the theme of the passage.

Hence, the correct answer is **Option 3** i.e. **3**.

**Q:6** The correct answer is **option 2** i.e. **5**.

**Correct order: 16523**

- **Sentence 1** sets the stage by introducing the topic of the impact of climate change on the world's oceans. It mentions that rising sea temperatures are causing coral reefs to die and negatively impacting marine life.
- **Sentence 6** continues the discussion by explaining how the melting of Arctic sea ice is causing changes in ocean currents and affecting the distribution of fish species.
- **Sentence 5** furthers the discussion by highlighting the impact of increasing acidification of the oceans. It explains that the acidification is making it difficult for shellfish and other sea creatures to build and maintain their protective shells.
- **Sentence 2** builds on the discussion by explaining how climate change is causing sea levels to rise and leading to the loss of coastal habitats and increased flooding.
- **Sentence 3** further highlights the impact of climate change on the oceans by mentioning the increasing levels of carbon dioxide in the atmosphere and how it is being absorbed by the oceans and leading to changes in their chemistry.

In this jumbled paragraph, **sentence 4** is the odd one out, but it is difficult to differentiate from the other sentences because it still discusses the impact of climate change on the world's oceans. However, instead of describing the negative impacts, it mentions a solution to help reduce the impact, making it a slightly different topic than the other sentences.

**Q:7** The correct answer is **option 5** i.e. **3**.

**Correct order: 16523**

- **Sentence 1** sets the stage by introducing the topic of the impact of climate change on the world's oceans. It mentions that rising sea temperatures are causing coral reefs to die and negatively impacting marine life.
- **Sentence 6** continues the discussion by explaining how the melting of Arctic sea ice is causing changes in ocean currents and affecting the distribution of fish species.
- **Sentence 5** furthers the discussion by highlighting the impact of increasing acidification of the oceans. It explains that the acidification is making it difficult for shellfish and other sea creatures to build and maintain their protective shells.
- **Sentence 2** builds on the discussion by explaining how climate change is causing sea levels to rise and leading to the loss of coastal habitats and increased flooding.
- **Sentence 3** further highlights the impact of climate change on the oceans by mentioning the increasing levels of carbon dioxide in the atmosphere and how it is being absorbed by the oceans and leading to changes in their chemistry.

In this jumbled paragraph, **sentence 4** is the odd one out, but it is difficult to differentiate from the other sentences because it still discusses the impact of climate change on the world's oceans. However, instead of describing the negative impacts, it mentions a solution to help reduce the impact, making it a slightly different topic than the other sentences.

**Q:8** The correct answer is **option 1** i.e. **6**.

**Correct order: 16523**
