Special Question – English Language

English

Q:1 The following questions are based on the passage that is jumbled and divided into some parts. Find out the actual sequence by rearranging them in the correct order to make the paragraph contextually and grammatically coherent and answer the questions that follow.

- A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.
- B. However, some people argue that the benefits of technology are outweighed by the negative effects it has on society.
- C. They point to issues such as addiction, cyberbullying, and the erosion of privacy as examples of how technology is harming us.
- D. Others believe that technology is a force for good, providing us with greater access to information increased convenience, and opportunities for remote work and learning.
- E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.
- F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Which of the following will come SECOND in the paragraph after the rearrangement?

1. F
2. A
3. C
4. E
5. D

Q:2 The following questions are based on the passage that is jumbled and divided into some parts. Find out the actual sequence by rearranging them in the correct order to make the paragraph contextually and grammatically coherent and answer the questions that follow.

- A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.
- B. However, some people argue that the benefits of technology are outweighed by the negative effects it has on society.
- C. They point to issues such as addiction, cyberbullying, and the erosion of privacy as examples of how technology is harming us.

- D. Others believe that technology is a force for good, providing us with greater access to information, increased convenience, and opportunities for remote work and learning.
- E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.
- F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Which of the following will come THIRD in the paragraph after the rearrangement?

1. A
2. B
3. E
4. C
5. D

Q:3 The following questions are based on the passage that is jumbled and divided into some parts. Find out the actual sequence by rearranging them in the correct order to make the paragraph contextually and grammatically coherent and answer the questions that follow.

- A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.
- B. However, some people argue that the benefits of technology are outweighed by the negative effects it has on society.
- C. They point to issues such as addiction, cyberbullying, and the erosion of privacy as examples of how technology is harming us.
- D. Others believe that technology is a force for good, providing us with greater access to information, increased convenience, and opportunities for remote work and learning.
- E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.
- F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Which of the following will come LAST in the paragraph after the rearrangement?

Date : 5th Dec 2023

Special Question – English Language

English

1. A
2. E
3. B
4. F
5. C

Q:4 The passage given below is followed by some summaries. Choose the option that best captures the author's position.

Technology has transformed the field of education in many ways. From online learning platforms to virtual reality simulations, students today have access to a wide range of digital tools and resources that can enhance their learning experiences. However, technology is not a panacea for all educational challenges. In some cases, it may even hinder learning by creating distractions or limiting face-to-face interaction. Therefore, educators must carefully consider the appropriate role of technology in the classroom and integrate it in a way that complements, rather than replaces, traditional teaching methods.

1. Technology is the key to unlocking the full potential of education and should be used to replace traditional teaching methods.
2. Technology has revolutionized education but can sometimes hinder learning and should be used selectively.
3. Traditional teaching methods are outdated and should be replaced by digital tools and resources.
4. Technology has limited value in education and should be used only sparingly.
5. C

Q:5 The passage given below is followed by some summaries. Choose the option that best captures the author's position.

The debate over the use of genetically modified organisms in agriculture is complex and contentious. While some argue that GMOs offer benefits such as increased crop yields and resistance to pests and diseases, others express concern over the potential environmental and health risks. Additionally, there are questions about the economic impact of GMOs on small farmers and the role of large corporations in controlling the food supply. Ultimately, the use of GMOs raises important ethical and social questions that must be carefully considered by policymakers, scientists, and the public.

1. GMOs offer numerous benefits to agriculture, including increased crop yields and resistance to pests and diseases.
2. The environmental and health risks associated with GMOs are too great to justify their use in agriculture.
3. There are valid arguments on both sides of the debate over the use of GMOs in agriculture, but policymakers must prioritize the interests of small farmers.
4. The use of GMOs raises important ethical and social questions that require careful consideration by various stakeholders.
5. C

Answer Key

1. (1) 2. (2) 3. (4) 4. (2) 5. (4)

Answers and Solutions

Q:1 The correct answer is **option 1 i.e. F.**

The paragraph begins by introducing the topic of technology and its impact on society in sentence A.

Sentence D introduces the perspective that technology is a positive force, while sentence B presents the opposing view that technology has negative effects on society.

Sentence E serves as a conclusion to the paragraph, emphasizing the complexity of the issue and the need to consider both positive and negative aspects of technology.

Finally, sentence F ends on an optimistic note, highlighting the potential for technology to improve our lives in ways we can't even imagine.

A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.

D. Others believe that technology is a force for good, providing us with greater access to information, increased convenience, and opportunities for remote work and learning.

B. However, some people argue that the benefits of technology are outweighed by the negative effects it has on society.

E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.

F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Q:2 The correct answer is **option 3 i.e. E.**

The paragraph begins by introducing the topic of technology and its impact on society in sentence A.

Sentence D introduces the perspective that technology is a positive force, while sentence B presents the opposing view that technology has negative effects on society.

Sentence E serves as a conclusion to the paragraph, emphasizing the complexity of the issue and the need to consider both positive and negative aspects of technology.

Finally, sentence F ends on an optimistic note, highlighting the potential for technology to improve our lives in ways we can't even imagine.

A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.

D. Others believe that technology is a force for good, providing us with greater access to information, increased convenience, and opportunities for remote work and learning.

B. However, some people argue that the benefits of technology are outweighed by the negative effects it has on society.

E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.

F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Q:3 The correct answer is **option 4 i.e. F.**

The paragraph begins by introducing the topic of technology and its impact on society in sentence A.

Sentence D introduces the perspective that technology is a positive force, while sentence B presents the opposing view that technology has negative effects on society.

Sentence E serves as a conclusion to the paragraph, emphasizing the complexity of the issue and the need to consider both positive and negative aspects of technology.

Finally, sentence F ends on an optimistic note, highlighting the potential for technology to improve our lives in ways we can't even imagine.

A. With the rise of technology, the way we live our lives has changed dramatically over the past few decades.

D. Others believe that technology is a force for good, providing us with greater access to information, increased convenience, and opportunities for remote work and learning.

B. However, some people argue that the benefits of technology are outweighed by the negative effects

Special Question – English Language

English

it has on society.

E. In reality, the impact of technology is a complex issue, and we need to carefully consider both the positive and negative consequences as we move forward.

F. Despite the challenges, many people are optimistic about the future and the potential for technology to improve our lives in ways we can't even imagine.

Q:4 The correct answer is option 2 i.e. Technology has revolutionized education but can sometimes hinder learning and should be used selectively.

Explanation: The passage acknowledges that technology has transformed education and provided new opportunities for learning. However, it also notes that technology is not a solution to all educational challenges and can even be a hindrance in some cases. The author's point of view is that technology should be used selectively, in a way that complements traditional teaching methods rather than replacing them.

Option 2 accurately summarizes this point of view.

Q:5 The correct answer is option 4 i.e. The use of GMOs raises important ethical and social questions that require careful consideration by various stakeholders.

Explanation: The passage discusses the complexity of the GMO debate, including the benefits and concerns surrounding their use in agriculture, the economic impact on small farmers, and the role of large corporations. However, the passage's main argument is that the use of GMOs raises important ethical and social questions that must be carefully considered by various stakeholders, including policymakers, scientists, and the public.

Option 4 accurately summarizes this main argument.
