Special Question - Logical Reasoning

English

Q:1 Each question given below consists of a statement, followed by two inferences numbered I and II. You have to decide which of the inference(s) follow(s) from the given statement.

Statement: Science and Technology Minister of country Y, introduced a Virtual Science Lab for Children under a Science-based Research center that will help students to interact with scientists across the country.

Inference:

I. Students of country Y will have more quality research exposure compared to the students of country X.

II. This initiative will prove to be fruitful for the students of country Y.

1. Only I follows
2. Only II follows
3. Both I and II follow
4. Either I or II follows

Q:2 Read the following statements carefully and decide which of the following conclusion(s) follow(s) the given statements.

Statement: The government of state X has introduced a road safety initiative through which first responders of road accidents will be trained. Some experts will train local people working at the nearby restaurants or companies located near accident-prone spots.

Conclusion:

I. Training the local people will help to provide first aid to the patient on time.

II. The number of accidents will be reduced.

1. Only conclusion I follows
2. Only conclusion II follows
3. Both conclusion I and II follow
4. None follows

Q:3 Read the following statement carefully and decide which of the following conclusion(s) follow(s) the given statement.

Statement: P.M. recently launched two innovative customer-centric initiatives of the Reserve Bank of India (RBI) - **RBI Retail Direct Scheme**, by which they can directly invest in securities issued by the government, and the **Reserve Bank - Integrated Ombudsman Scheme**, which will be a single point of reference for customers to file their complaints, submit the documents, track status, and provide

feedback.

Conclusion:

I. It will improve access to the government securities market for retail investors.

II. It will be a time-saving initiative.

1. Only I follows
2. Only II follows
3. Both I and II follow
4. None follows

Q:4 Statement: The government has announced a new policy to promote renewable energy sources.

Assumptions:

I. There is a need to reduce dependence on non-renewable energy sources.

II. The new policy will lead to a significant increase in the use of renewable energy sources.

1. Both assumptions I and II follow
2. Only II follows
3. Only I follows
4. Neither I nor II follows

Q:5 In the following question, a statement is given followed by two arguments. You have to decide which argument(s) are strong in the given statement.

Statements:

Should TV reality shows be completely banned in India?

Arguments:

I. No, there should be no such ban on the creative pursuits of the filmmaker.

II. Yes, this will significantly damage the mind and kill the time of the young generation.

1. If only argument I is strong
2. If both I and II is strong
3. If only argument II is strong
4. If either I or II is strong

Special Question - Logical Reasoning

English

Answer Key

1. (2) 2. (1) 3. (3) 4. (3) 5. (2)

Answers and Solutions

Q:1 The correct answer is **Option 2** i.e. **Only II follows**

Inference I: Nothing about the students of country X is mentioned so, they may or may not have quality research exposure compared to country Y. So, it does not follow.

Inference II: This inference follows as it is mentioned that it will help students to interact with scientists and students will get to know more important things and clear their doubts as well.

Hence, **option 2** is the correct answer.

Q:2 The correct answer is **Option 1** i.e. **Only conclusion I follows.**

Conclusion:

I. Training the local people will help to provide first aid to the patient on time. **True** (as it is mentioned that first responders of road accidents will be trained by experts and providing first-aid is the first and foremost part of treating any person)

II. The number of accidents will be reduced. **False** (Training the local people to treat the wounded people is mentioned not about the reduction in the number of accidents.)

Hence, **only conclusion I follows.**

Q:3 The correct answer is **Option 3** i.e. **both I and II follow.**

Conclusion:

I. It will improve access to the government securities market for retail investors. **True** (as it is given that the RBI Retail Direct Scheme will help them to directly invest in securities issued by the government.)

II. It will be a time-saving initiative. **True** (as direct investment in government securities can be made and there will be a single point of reference for customers to file their complaints, submit the documents, track their status, and provide feedback. This will save time.)

Hence, **both I and II follow.**

Q:4 The correct answer is **Option 3** i.e. **Only I follows**

Assumption I is valid because the government's announcement of the new policy implies a need to promote renewable energy sources, which can be seen as a step towards reducing dependence on non-renewable energy sources.

Assumption II is not necessarily valid, as it is possible that the new policy may not lead to a significant increase in the use of renewable energy sources. While the policy aims to promote renewable energy sources, its effectiveness in increasing their use depends on several factors such as the level of implementation and uptake by the public and industry.

Therefore, only assumption I is valid in this case.

Hence, the correct answer is **Only I follows.**

Q:5 The correct answer is **Option 2** i.e. **If both I and II are strong.**

Arguments I and II are strong as this move affects the creativity of the film badly

TV reality shows are the creative pursuits presented by the filmmaker and of course, this will significantly damage the mind and kill the time of the young generation.
